SVELTE • TEMPLATE SYNTAX

{@const ...}

The `{@const ...}` tag defines a local constant.

```
{#each boxes as box}
  {@const area = box.width * box.height}
  {box.width} * {box.height} = {area}
{/each}
```

`{@const}` is only allowed as an immediate child of a block — `{#if ...}`, `{#each ...}`, `{#snippet ...}` and so on — or a `<Component />`.
